

Action Plan 2010/11

- We will try and establish a gardening club, growing our own fruit, vegetables & flowers, aiming to involve Prep and Pre-Prep children.

- We will take part in Switch-Off Fortnight and try and encourage the sensible use of electricity throughout the school.

- We will look into establishing a whole-school environmental club on Wednesday afternoons, with a variety of activities/projects within it, involving larger numbers of children.

Activities may include:

1. Involvement in local environmental projects
2. Wildlife surveys
3. Tree planting and stewardship
4. Vegetable & fruit growing

- We will look at methods of reducing our existing energy consumption and alternative ways of supplementing our energy supply.

- We will encourage people to waste less food and try and establish a routine for recycling our packed lunch waste.

- We will see if we can compost our green waste/food waste better.

- We will work on an agreed format for an outdoor classroom with the Pre-Prep and continue to develop closer links between the Pre-Prep and the Prep in terms of our continuity of environmental learning.
